Other: WebSockets, tRPC, Jest, Cypress, Strapi

Experience

Web3Scope

(Remote) Bengaluru, India

Frontend Engineer

04/2023 – present

- Developed and optimized reusable components using ReactJS, NextJS, and SCSS, enhancing user engagement.
- Created and integrated components with backend APIs, utilizing tables and charts for dynamic data presentation.
- Improved application performance and UI through chaos engineering, leading to an 80% increase in user satisfaction.

BrainyBeam Info.tech

(Remote) Ahmedabad, India

Full Stack Engineer

05/2024 – 06/2024

- Developed FreshFruitHub, an online platform for fresh fruits and vegetables, boosting the company's e-commerce presence.
- Implemented key functionalities including user authentication, shopping cart, and wish list features.
- Enhanced UI design with best UI/UX practices, improving user experience.

Projects

Live Demo — GitHub

FramePhase

Feb 2024 – Mar 2024

- Developed FramePhase, a next-gen captions generator app using Next.js 13 and AWS for automated transcription, streamlining the content creation process.
- Empowered creators with customizable options and enhanced accessibility, leading to a 25% increase in user engagement compared to other caption generators.
- Tech Stack: Next.js 13, TailwindCSS, WebAssembly, AWS S3 Bucket, AWS Transcribe, Figma

Live Demo — GitHub

GitHub Landing Page

Jan 2024 – May 2024

- Re-created the GitHub home page using Next.js, significantly improving performance and user experience.
- Designed sections in Figma before implementation, ensuring a consistent and professional look.
- Tech Stack: Next.js 13, TypeScript, TailwindCSS, Figma, Framer Motion

Education

A.D. Patel Institute of Technology

B.Tech in Information Technology

Anand, Gujarat

2021 – 2025
